1.Introduction

1.1Purpose

The main objective of this document is to illustrate the requirements of the project **Library Management system**. The document gives the detailed description of the both functional and non functional requirements proposed by the client. The document is developed after a number of consultations with the client and considering the complete requirement specifications of the given Project. The final product of the team will be meeting the requirements of this document.

1.2Document Conventions

The following are the list of conventions and acronyms used in this document and the project as well:

Administrator: A login id representing a user with user administration privileges to the software

- **User:** A general login id assigned to most users
- **Client:** Intended users for the software
- **SQL:** Structured Query Language; used to retrieve information from a database
- **SQL Server:** A server used to store data in an organized format
- **ASP:** Active Server Pages: A Web Page formatted on the server and delivered to the browser.
- **Layer:** Represents a section of the project.
- **User Interface Layer:** The section of the assignment referring to what the user interacts with directly.
